

Rotomoulded Products

1

Boat Lifts, Jet ski docks and Superior Modular Docks (SMD's) are all designed for non-deterioration in marine environment and can all easily connect to any pontoon or marina structure.

2

The D-Series Boat Lift utilises drive on pontoon technology; the vessel can be driven straight on to the lift to provide berthing out of water.

3

Stylish jet ski docks ensure that all craft are stored completely out of the water. Multiple docks can be connected side by side to form a continuous dock for commercial use.

4

Polyethylene SMD modules are tough, UV resistant and versatile for arranging in any configuration.
